TAURUS

Taurus is earth and power, guardian and protector of the circle of life. His axe brings sense to whoever dares defy him and under his helmet and cape there hides a warlord; slumbering, patient, elusive. A colossus who provides a warning with his horns, who breaks the ground and bellows a breath to fear. When Taurus attacks, there is no pity for his enemies.

Gemini, unrelenting warrior with a gentle voice in her song, “the Ballad of Triumph”. CANCER

Only the Moon can change the phase and order of Cancer, sorceress and mother of the emotions, where her staff keeps the secret of her power and control of water, the tides; the lack of air under the mantle of a kiss and her pincers break the flesh and the being. A mirage, the illusion of melancholy.

LEO

Where just a few can reach, and the sun burns the earth and life,
a leader emerges: Leo, “the generous king”. A storyteller, a
barbarian warrior who protects his own. Lethal in combat, he
won’t flinch from showing his most savage side when necessary.
Leo's fury indicates that there is no going back, that he is ready
to fight, the roar of war which stops time.

LIBRA

Libra is judgement, balance, the limit between being and insanity. Guardian of the keys of truth and love, she does not need the sight from her eyes to know what is inside you. If you try to trick Libra, you will never pass through the arch of her domains, as she will find the truth even if she has to forge her way through your shadows and your entrails; the celestial scales.

Aquarius, the water carrier, he who brings life in his ox-hide flask, who turns you away from it with the melody of his song, the poems of the troubadour. SUPER - MATT FINISH (S M C 0 1 - 1 6)

These paints have a super-matt finish desired by most professional and amateur miniature painters. They are creamy paints and the degree of opacity allows us to make glazes easily, achieving superior results.

ultra fine pigments

These paints are characterized by the fine pigmentation, solid coverage due to its formulation, it compliments blending metallic or non-metallic colors, behaving as if they were an opaque acrylic paint, without pigment deterioration. The variety of the different shades allows us to paint all types of metals.

Inks are transparent colors with a high degree of pigmentation. Depending on the dilution with water (brush) or Thinner (airbrush), we can get more or less color saturation. They are slightly satin and serve to create glazes that can be applied on all types of surfaces and can be mixed with other acrylic paints.
